## DETAILED ACTION

### ***Election/Restrictions***

Applicant's election without traverse of Invention I in the reply filed on 06/20/2006 is acknowledged.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(d) the invention was first patented or caused to be patented, or was the subject of an inventor's certificate, by the applicant or his legal representatives or assigns in a foreign country prior to the date of the application for patent in this country on an application for patent or inventor's certificate filed more than twelve months before the filing of the application in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(d) as being barred by applicant's Japanese patents JP2004119681 A and JP2004119578 A. These patents were both filed for more than twelve months prior to the application for a patent in the US.

(Re claim 1) "a tape feeding system provided with drive source ... being adjustable for a plurality of pitches" (38 figure 3). "a suppressor formed with an opening" (27 figure 9). "a control device setting a feed stop position of electronic components" (figure 10)

(Re claim 2) "a shutter disposed over the opening of the suppressor" (77 figure 9).

(Re claim 3) "configured to set the feed stop position by using a head electronic component" (A figure 9).

(Re claim 4) "the control device sets the feed stop positng at the center of the opening ... larger then" (figure 13).

(Re claim 5) "opening is configured so that electronic component is picked up by a suction nozzle" (27a figure 9).

(Re claim 6) "recognition camera taking an image ... feed stop position based on a recognition result" (figure 10).

(Re claim 7) "recognition camera taking an image ... feed stop position based on a operation of the operating portion by the operator" (figure 10).
